

# GO Green Digital Receipts

Save millions of trees, and gallons of oil and water annually.

## Embrace Sustainability

You can help your merchants break the cycle of waste, reduce their carbon footprint, and do their part to save the environment with the iPOSpays' GO Green e-receipt option. Your merchants can easily send e-receipts to their customers via text or email. They can also send mini-receipts, which reduce paper usage by 50%.

## Convenience

Easy to store and access when needed, e-receipts mean customers no longer have to worry about losing paper receipts. Merchants can also send receipts directly to their customers via SMS message, where they can keep them on their mobile devices. Add to that the contactless nature of digital receipts, and you have a winning solution!

## Make More Money

Digital receipts give retailers an easy way to grow email lists and gather customer data at the transaction level. They can also deliver unique offers, loyalty points, and more. Dynamic content within digital receipt programs allows retailers to provide unique content relevant to each customer.

## Merchant Benefits of Going Green

Imagine never having to worry about running out of receipt paper. Instead, merchants can focus on providing excellent customer service. Digital receipts can't be lost or stolen like paper receipts because they're emailed directly to your merchants' customers.

## THE FUTURE IS GO GREEN.

Whether your merchants are considering a change for environmental or financial reasons, digital receipts are the way forward for today's business owners. They are secure, always available, a great marketing tool, and a money saver. Contact us today, to learn more.
